

11、稍等，出现以下屏幕，输入 root，按 Enter。输入密码 root，按 Enter。这里注意，密码 root 输入后不显示。在输入密码 root 后直接按键盘上的 Enter 就行了。

```
Sun Oct 6 20:38:19 CST 2013
FreeBSD/i386 (router.netzone.com) (ttyv0)
login: █
```

```
Sun Oct 6 20:38:19 CST 2013
FreeBSD/i386 (router.netzone.com) (ttyv0)
login: root█
```

```
Sun Oct 6 20:38:19 CST 2013
FreeBSD/i386 (router.netzone.com) (ttyv0)
login: root
Password: █
```

12、屏幕下方出现提示，输入“`./setup`”，注意前面有点。按 Enter。

```
router# ./setup█
```

13、以下按图操作，输入后就按 Enter

```
Do you want to continue(y/n[n])? █
```

```
Do you want to continue(y/n[n])? y
Following disks are detected: ad0
Please select one [ad0]: █
```

```
Do you want to continue(y/n[n])? y
Following disks are detected: ad0
Please select one [ad0]: ad0
```

```
WARNING:
We will format the disk "ad0" and start the installation!
Do you want to continue(y/n[y])? 
```

```

15、把网线插在流控大师的最右边的网口上，流控大师上面是 EM5，非官方工控机应该是网口 6。连接交换机和电脑。流控大师启动后就可以进入流控大师路由器进行设置了。

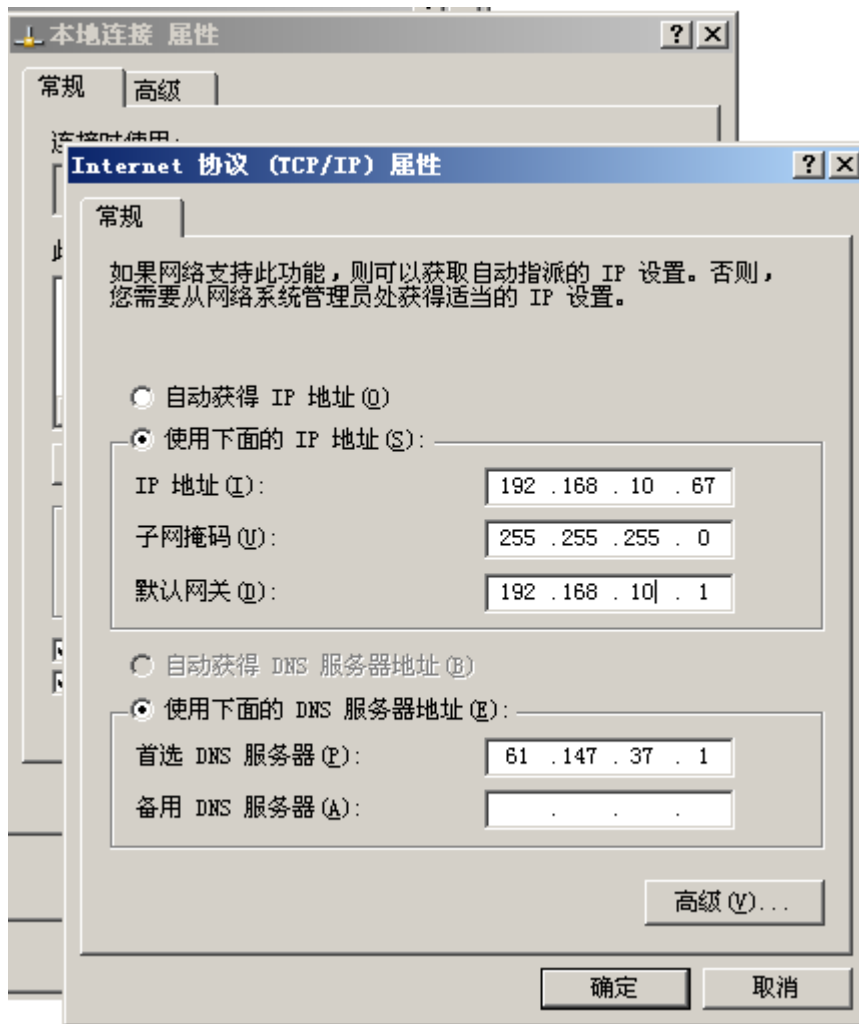

16、刚才安装时流控大师使用的是 192.168.10.1 地址，连接的电脑也要设置一下才可以登录流控大师。

17、在 IE 浏览器里面输入流控大师的 IP 地址，注意有 **S**，按 Enter

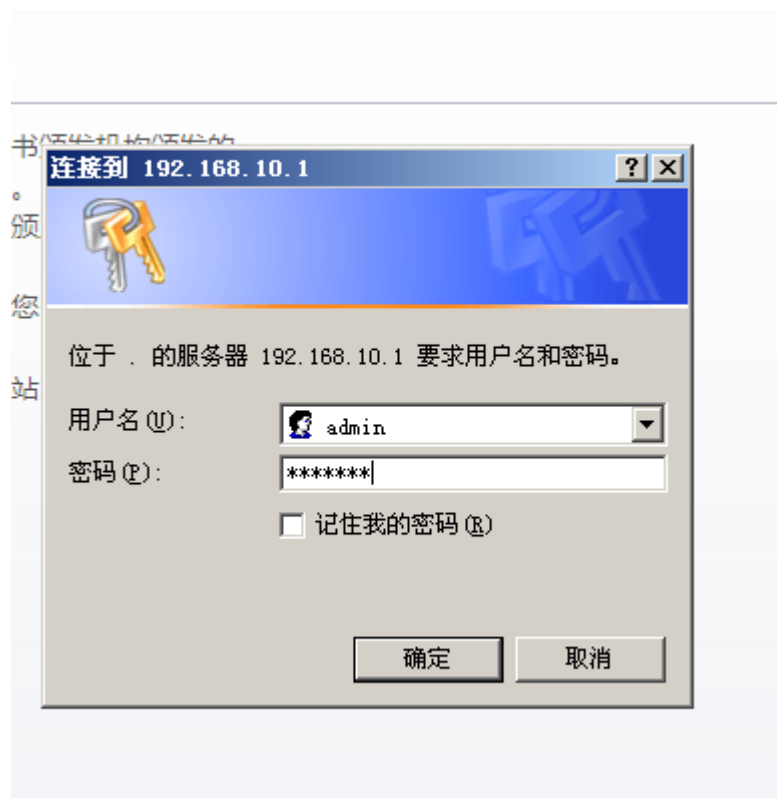

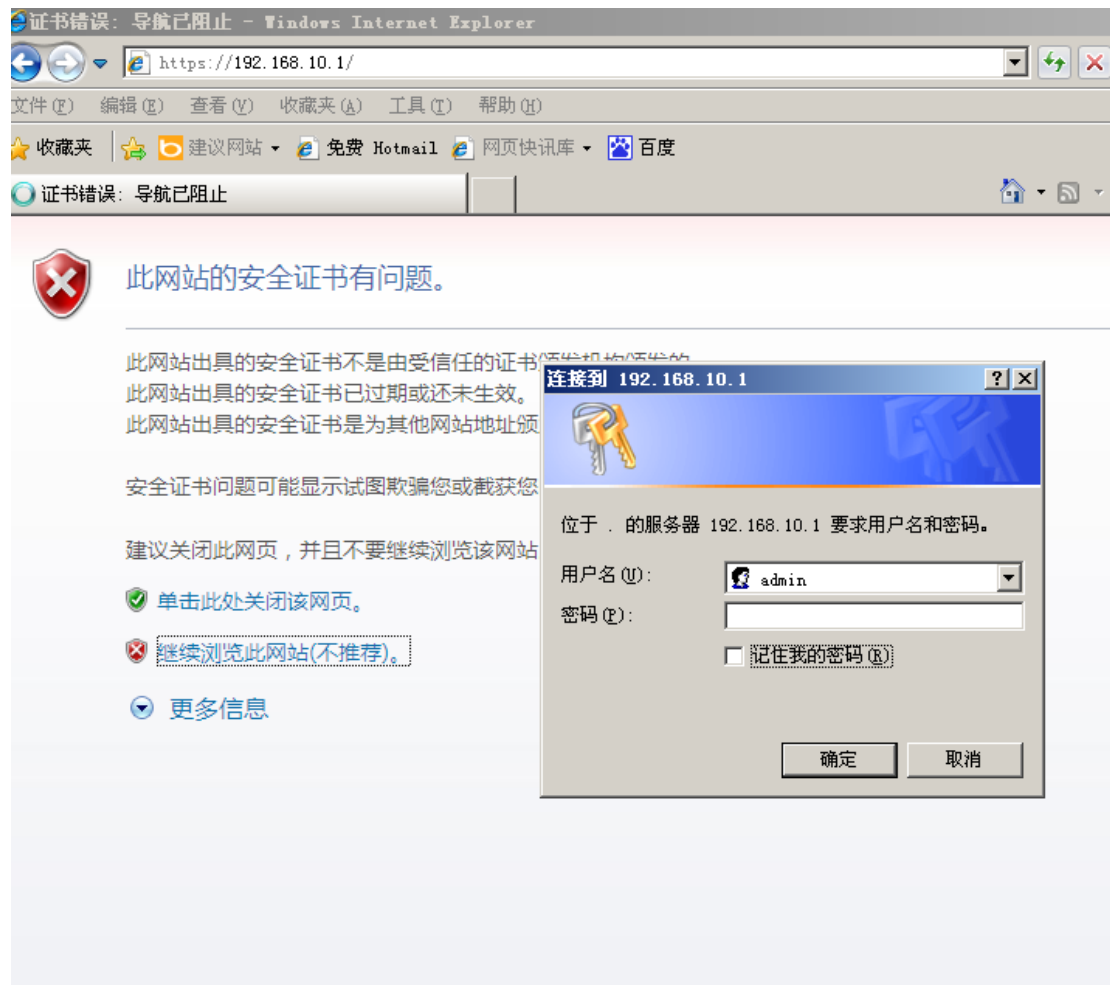

18、单击继续浏览此网站

 [继续浏览此网站\(不推荐\)。](#)

19、用户名是 admin，密码是 netzone

20、看到这个画面，你的流控大师就算成功安装了。恭喜你！

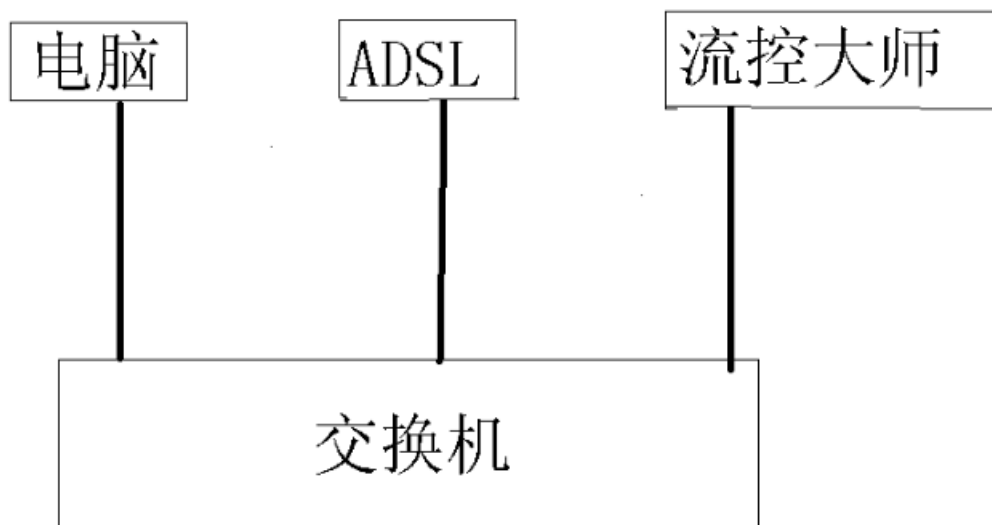

向导更新中，敬请期待……

向导应用程序，可直接[点此](#)下载

点击这里可以获取[新版升级包](#)

21、请求流控大师的工程师远程协助。在你上不了网的时候，工程师很难给你有力的支持。现在需要你搞好外网的连接，如下图。在电脑上使用 ADSL 拨号上网。拨号连接成功。现在就可以请求工程师远程协助了，工程师可以完成很多高难度的设置。

宽带
